

BUTTERFLY FOR GUARDRAIL

Product Codes DGRB

DIMENSIONS AND SPECIFICATIONS

Overall Width (facing traffic)	80mm
Delineator face width	50mm
Delineator face depth	135mm
Total length	360mm
Material thickness	3mm

DEFINITION

Delnorth Hylite delineators are a highly visible flexible road safety device suited for installation to guardrail, bridge rails and concrete barriers to provide a safer road user environment. They are manufactured from 3mm UV stabilised PVC in various shapes and sizes to suit the barrier type, material and shape. The Butterfly is best suited for guardrail.

DELINEATION

The Butterfly delineator is fitted with 50mm x 135mm Class1A reflective sheeting in accordance with AS/NZS 1906.1-2017 retroreflective

materials and devices for road traffic control purposes and retroreflective sheeting, and AS/NZS 1906.2-2007 (R2018) retroreflective materials and devices for road traffic control purposes – retroreflective devices (non-pavement application).

WEATHER RESISTANCE

Delnorth Hylite delineators are manufactured from UV stabilised 3mm PVC to provide exceptional UV resistance and superior weathering characteristics.

DURABILITY

Upon impact, Hylite delineators will repeatedly return to their original position.

INSTALLATION

All Hylite delineators are designed to be easily but securely fitted to barriers. The Butterfly delineator can be fixed using existing bolt but also has holes or a slot for bolt fastening subject for to the application.
