

JOINT 10 SERIES FOR GUARDRAIL

Product Codes DGRJ10, DGRJ10R, DGRJ10A, DGRJ10W

DIMENSIONS AND SPECIFICATIONS

Overall Width (facing traffic)	90mm
Delineator face width	80mm
Delineator face depth	125mm
Total length	195mm
Material thickness	3mm

DEFINITION

Delnorth Hylite delineators are a highly visible flexible road safety device suited for installation to guardrail, bridge rails and concrete barriers to provide a safer road user environment. They are manufactured from 3mm UV stabilised PVC in various shapes and sizes to suit the barrier type, material and shape. The Joint 10 series is best suited for guardrail.

DELINEATION

The Joint 10 series delineator is fitted with 80mm x 125mm Class1A reflective sheeting in accordance with

AS/NZS 1906.1-2017 retroreflective materials and devices for road traffic control purposes and retro-reflective sheeting, and AS/NZS 1906.2-2007 (R2018) retroreflective materials and devices for road traffic control purposes - retroreflective devices (non-pavement application)

WEATHER RESISTANCE

Delnorth Hylite delineators are manufactured from UV stabilised 3mm PVC to provide exceptional UV resistance and superior weathering characteristics.

DURABILITY

Upon impact, Hylite delineators will repeatedly return to their original position.

INSTALLATION

All Hylite delineators are designed to be easily but securely fitted to barriers. The Joint 10 delineator can be fixed using a suitable adhesive but also has holes or a slot for bolt fastening subject for to the application.
