

polyflex

Flexible Injection Moulded Polymer Bases, Posts and Fixtures.

Poly-Flex significantly reduces your organisation's sign replacement and installation costs.

High quality polymer, master batch (colour) and UV stabilizers are injection moulded at Delnorth manufacturing facilities to provide products with high impact resistance.

SMSF + Steel-Flex®

Durability

- › 360° impact range
- › Bends to over 90°
- › Withstands multiple wheel overs
- › -50° to + 60° thermal resistance
- › UV stabilized
- › Colour fast

Uses

- › Bases, posts and fixtures support Sign-Flex® signs as well as traditional aluminium sign products
- › Superior to alternative metal products in high impact locations
- › Steel-Flex® surface mounts for concrete surfaces

Economy

- › Significantly lower maintenance
- › Fast installation
- › Reduced product replacement
- › More cost effective over time
- › Performs after multiple impacts

Customise

- › Multiple colour options
- › All post lengths include end caps
- › Available with surface mount and socket mount bases
- › Polymer ingredients can be set to your budget
